REPORT NOTE

Network-facing findings are presented as an operator-ready summary of exposed ports, services, and initial attack surface clues.

EXECUTIVE SUMMARY

Network exposure snapshot

OPEN PORTS

3

Reachable network services observed on the target.

FINDINGS

3

Port-linked vulnerabilities included in the report.

CRITICAL

0

Critical severity exposure requiring immediate review.

HIGH

2

High severity issues mapped to discovered services.

MEDIUM

1

Medium severity findings requiring triage.

INFO

0

Informational exposure or service metadata.

SERVICE INVENTORY

Open port matrix

Port	Proto	State	Service	Version
22	TCP	open	ssh	Unknown
80	TCP	open	http	Unknown
443	TCP	open	https	Unknown

RISK NARRATIVE

Findings tied to surfaced network services.

Open Port: 22/tcp

SEVERITY

MEDIUM

CATEGORY

Network - Open Port

PORT

22

Port 22 is open running ssh service

Open Port: 80/tcp

SEVERITY	HIGH
CATEGORY	Network - Open Port
PORT	80

Port 80 is open running http service

Open Port: 443/tcp

SEVERITY	HIGH
CATEGORY	Network - Open Port
PORT	443

Port 443 is open running https service
